EDUCATION

University of California, Davis

Davis, CA

B.S. in Data Science, B.S. in Computational Cognitive Science, Computer Science Minor

Aug. 2022- June 2026

- Relevant Courses: Machine Learning, Bioinformatics, Time Series Analysis, Artificial Intelligence, Statistical Data Science, Regression Analysis, Computational Cognitive Neuroscience

EXPERIENCE

Breaking Games [Extern]

SQL & Database Architecture Externship

July 2026 - Present

- Applying SQL and relational database design to e-commerce analytics and marketing attribution use cases
- Building schema design and query optimization skills to support business intelligence reporting

ASUCD Pantry

Davis, CA

Data Science Coordinator

Sept. 2025 - June 2026

- Designed and maintained analytical dashboards in Tableau and Streamlit, translating raw survey and operations data into actionable insights for program coordinators serving 5,000+ students
- Built end-to-end data pipeline using Python & Streamlit to support recurring operational reporting
- Presented findings and recommendations directly to non-technical managers, informing decisions on Pantry operations

Neurotech@Davis

Davis, CA

Co-Head of Projects Division

June 2025 - June 2026

- Leading cross-functional coordination & timeline management across 10 concurrent technical projects, aligning distributed teams around delivery milestones

Data Acquisition & ML Engineer

Sept. 2023 - June 2025

- Managed end-to-end project execution from data collection through model development, applying structured experimental design and presenting findings to technical and non-technical audiences at the California Neurotechnology Conference: [2024](#), [2025](#)

PROJECTS

ASUCD Pantry: Patron Satisfaction Analysis | *Python, Streamlit*

Oct. 2025 - Mar. 2026

- Designed patron satisfaction survey & built end-to-end data pipeline including data collection, cleaning, & aggregation
- Developed interactive analytics dashboard in Streamlit to present operational insights to program coordinators

Neural Decision Making Analysis | *R, Markdown*

Jan. 2025 - Mar. 2025

- Analyzed neural activity data from 30,000+ recorded neurons across 18 experimental sessions using R
- Applied feature engineering & data integration methods for imbalanced trial data across 4 subjects
- Developed weighted Random Forest classification model to predict behavioral outcomes, achieving 74.2% accuracy on held-out validation set

Voice Part Classifier | *Python, Jupyter*

Aug. 2025

- Built proof-of-concept ML classification model to predict vocal part (soprano, alto, tenor, bass) from audio features including pitch, range, and vocal quality
- Developed for real audition use case within a student a cappella group

TECHNICAL SKILLS

Languages: Python, SQL, R, HTML/CSS

Developer Tools: Git, Tableau, Streamlit, Figma, Jupyter

Libraries: pandas, NumPy, Matplotlib, scikit-learn

Methods: Statistical Modeling, Data Visualization, Analytics, Data Cleaning, Feature Engineering

ACHIEVEMENTS

Certifications: Google UX Certification (Summer 2023); CITI Biomedical Research (Feb 2025 – Feb 2028)
